Press-button loading mechanism: First hoodtop stapler
(NOVUS B 6) with press-button loading mechanism

Solid basis

for innovative and long-lasting

product solutions.

Great ideas and proven brand quality over generations

Since the company was founded in 1949 there are many reasons why the Novus brand has made a name for itself across the globe. As a subsidiary of the emco Group, Novus is defined by high quality standards and an innovative spirit that never tires.

The "German Engineering" label is synonymous with efficient and sustainable processes along with quality, functionality and durability in everything we produce. Certification under DIN EN ISO 9001 and DIN EN ISO 14001 also confirm that Novus actively works to international quality and environmental standards.

Dipl.- Ing. Harald Müller,
Second-generation Managing Director of emco Group

Timeless design: No other stapler demonstrates a higher standard of quality and design than the classic NOVUS B 6 stapler does – a stapler that's been around for over 60 years.

Attractive range of colours: Novus offers a wide choice of colours from classic to trendy.

Practical design: Novus products not only look impressive, they are also comfortable to hold – and a pleasure to work with.

Modern design for a perfect look

Functionality ⁱⁿ
perfect shape.

Biodegradable

After separating component materials by type, the sustainably produced wood-plastic composite can be disposed of without any impact on the environment.

- Reduces CO₂ thanks to eco-friendly wood-plastic composite material
- Biodegradable in line with DIN EN ISO 14851
- Resource-friendly in production
- Reliable

NOVUS eco products: Enduring performance in the office, with a warranty lasting up to 25 years, in attractively shiny night blue.

Strong team – NOVUS eco products: flat-clinch stapler B 4 FC, stapler B 4, perforator B 225 and stapling plier B 36 FC.

Natural beauty for
working efficiency.

More options,
more **variety**, more **uses**:
the 3-in-1 principle.

Three fastening styles

1. Permanent stapling

Classic first-class stapling quality – for reliably keeping documents together.

2. Temporary stapling

Ideal for keeping papers together for short periods: staples can be removed quickly and easily.

3. Nailing

Notices, photos and the like can be tacked to a cork pin board in next to no time – easily, neatly, securely.

Achieving more _{with}
less effort.

Patented in **1998**

Flat-clinch: Patent granted for the world's first flat-clinch desktop stapler with movable anvil (B 4 FC)

Flat-clinch stapling for more filing space

More and more space: With staple legs resting flat against the paper, flat-clinch stapling cuts filing space by over 30%, optimising of binder capacity.

Simply more capacity: Flat-clinch technology increases stapling capacity by 25% – with up to 40% less effort. To make work easier.

POWER
on Demand

-70%

Stapling more with
very little effort.

Patented in **2008**

Power on Demand: Patent granted for the world's first desktop stapler with power assistance from a fold-down lever (B 8 FC)

Power on Demand for easier action

It's as easy as this

Simply raise the top part of the handle and start stapling with 70% less effort. That's full performance for up to 50 sheets of paper.

Easy, systematic way to
no-stress stapling.

Anti-blocking system takes the stress out of stapling

Jammed staples a thing of the past

Getting on with work without jammed staples or hitches: the spring-loaded staple holder automatically releases its staples whatever the situation.

This is how Novus ABS works.

Staying ahead the easy way: All it takes with the patented automatic mechanism is a touch of the finger to finish the stapling cycle all automatically.

Automatic perfection: Papers perfectly stapled in half the handle squeezing distance.

Excellent results all automatically

Just a gentle squeeze
to stapling perfection.

Patented in 1990

Automatic system: Patent granted for the
B 7A stapler's automatic system

Quality and precision
for perfect results.

TIP

Basic rules for good stapling practice:

Paper stack height + 3 mm = recommended staple leg length

(Note: 10 sheets of standard 80 g/m² paper is about 1 mm thick)

Staples make all the difference

Top staple quality

- NOVUS 24/6 precision-manufactured in compliance with DIN standard 7405
- Produced from best-quality steel wire for neat stapling results
- Dimensional accuracy guaranteed for trouble-free stapling
- Optimum adhesion between non-breakable staple crowns allow staple separation while stapling

Ideal combination: Novus staplers are designed for use with Novus-brand staples. This is why Novus staplers come with 25 year warranty if used with Novus staples.

Absolute precision: Strain tests show: the components and design behind every Novus stapler combine precision functionality with lasting performance.

Structured for strength: The key components of Novus staplers and stapling pliers are made of solid metal – for maximum stability even after years of service.

Metal

All-metal design for all the benefits

It's a matter of values –
all-metal for long life.

Easy to empty: Perforator base that can be opened half-way for simple emptying.

Exact paper size setting: The easy-to-read paper size guide clicks into place for precision punching.

Accurate filing guaranteed –
with **precision** in every detail.

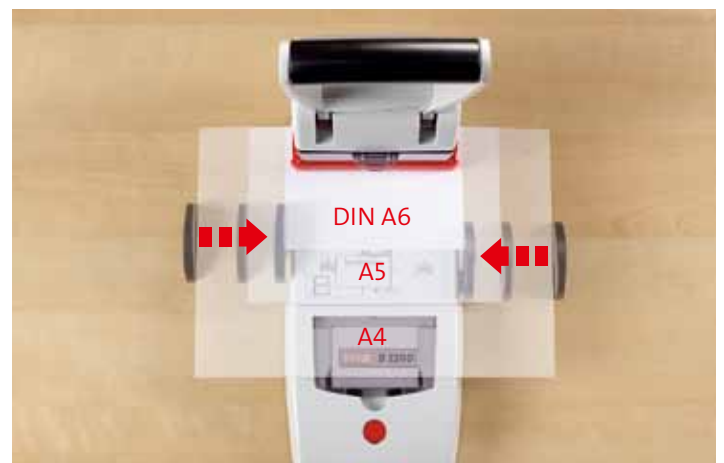

Responding to different
demands with flexibility.

Patented in 2008

Sliding adjustment unit: Patent granted for the world's first block perforator with sliding adjustment unit (B 2200)

High-performance block perforators that can do more

Change in next to no time: Centring function provides perfectly centred precision punching whatever the paper size.

Absolute precision: Change to fourhole punching simply by sliding the adjustment unit.

Refilled with press button loading system.

The practical paper positioning guide keeps the stapling position constant, also at an angle of 45 degrees.

Integrated reserve compartment for storing staples to plan ahead.

Heavy-duty staplers to make work easy

Powerful performers
for great results.

Innovation with proven
performance and choice.
